

### ■ Features

- Temperature protection provided by directly detecting the junction temperature of the IGBTs.
- Low power loss and soft switching.
- High performance and high reliability IGBT with overheating protection.
- Both P-side and N-side alarm output available.
- Higher reliability because of a big decrease in number of parts in built-in control circuit.

### ■ Maximum ratings and characteristics

- Absolute maximum ratings(at Tc=25°C unless otherwise specified)
